WALL MOUNTING HARDWARE

TOOLS REQUIRED

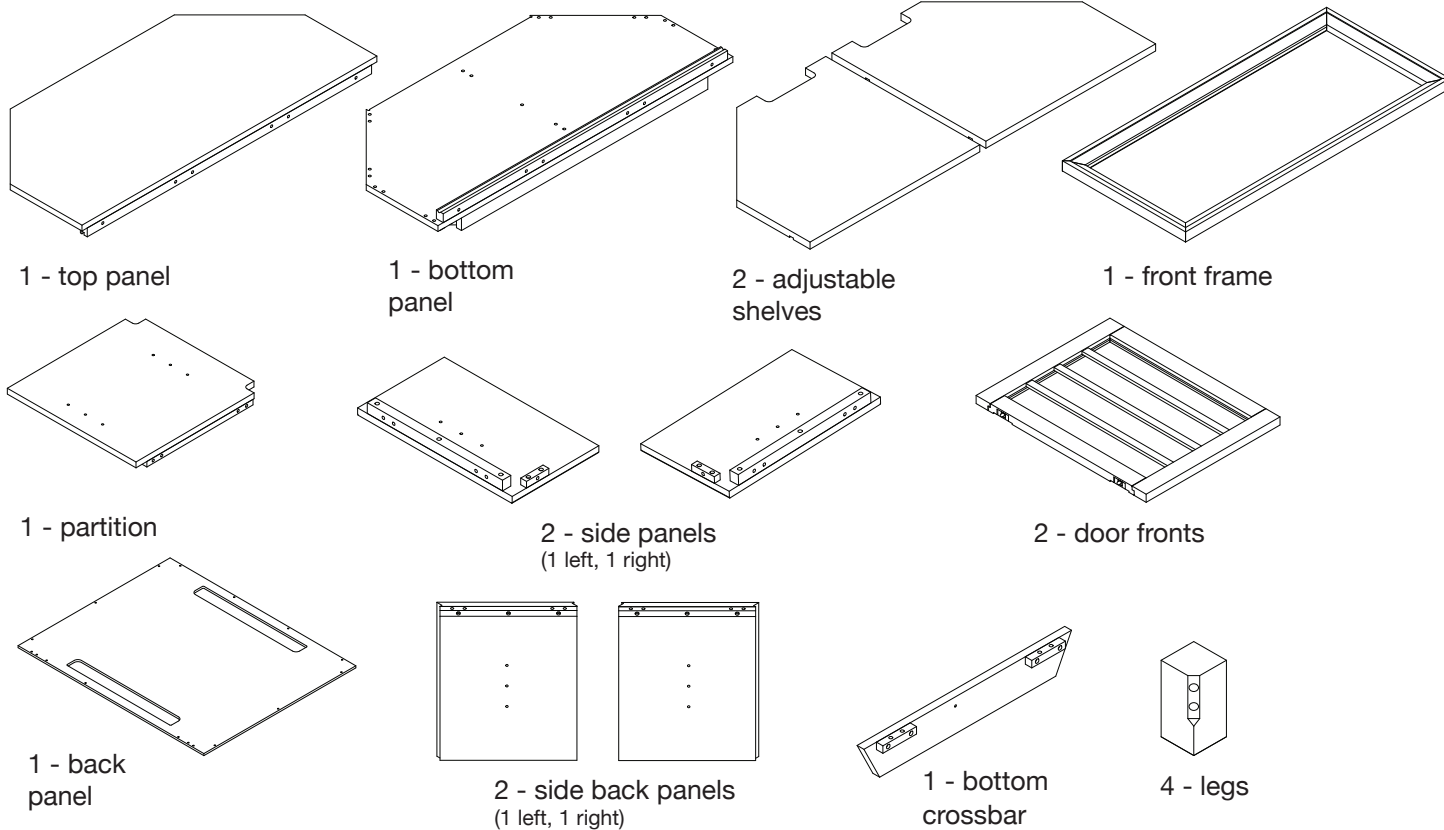

allen wrench (included)

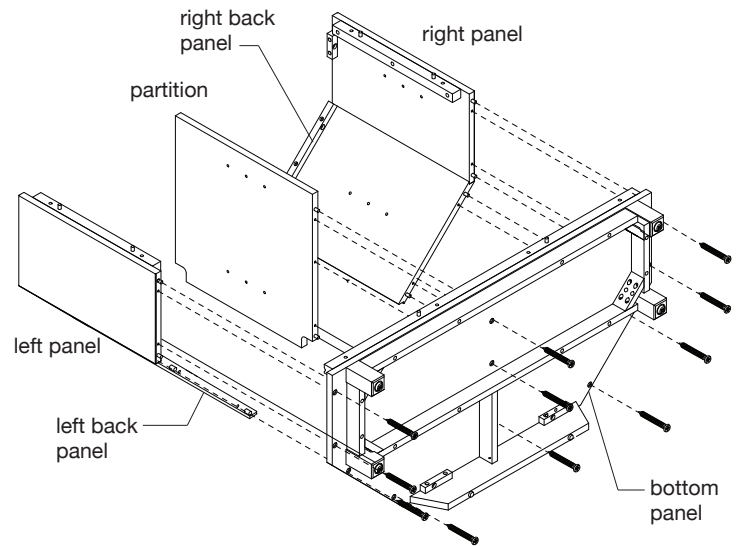

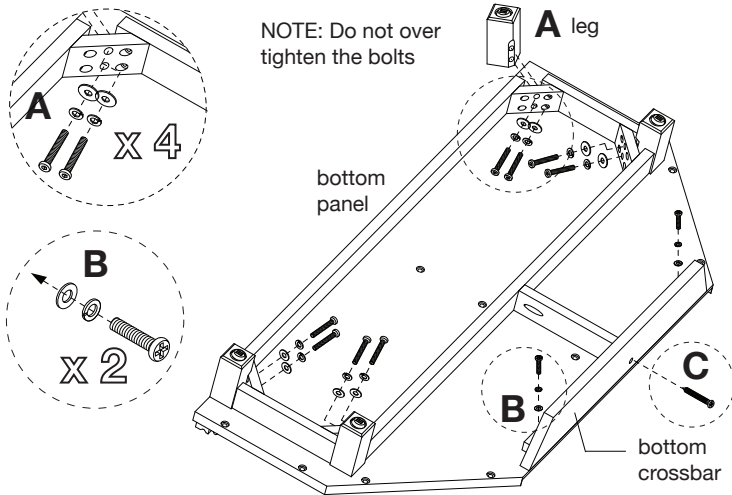

phillips head screwdriver

(We recommended the use of hand tools instead power tools)

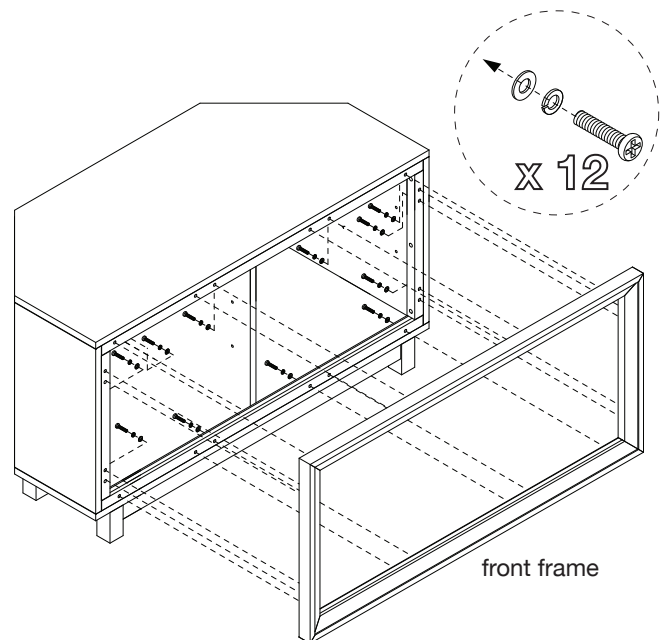

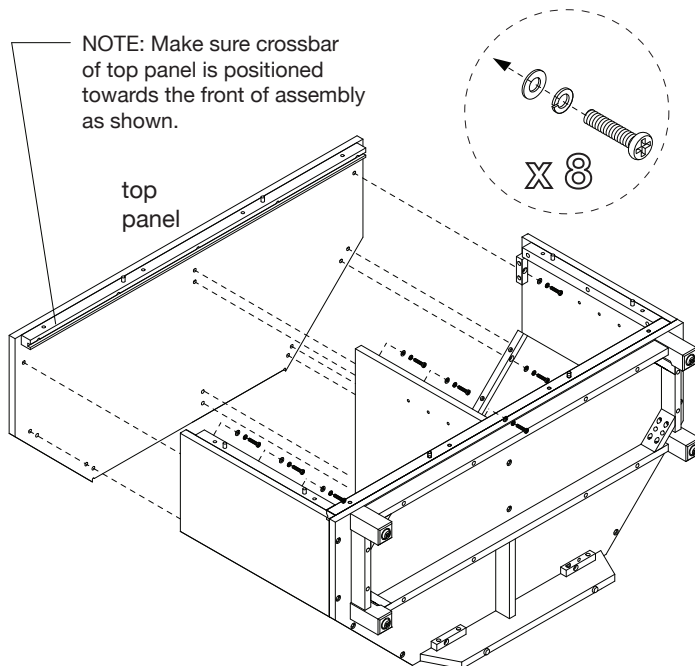

COMPONENTS

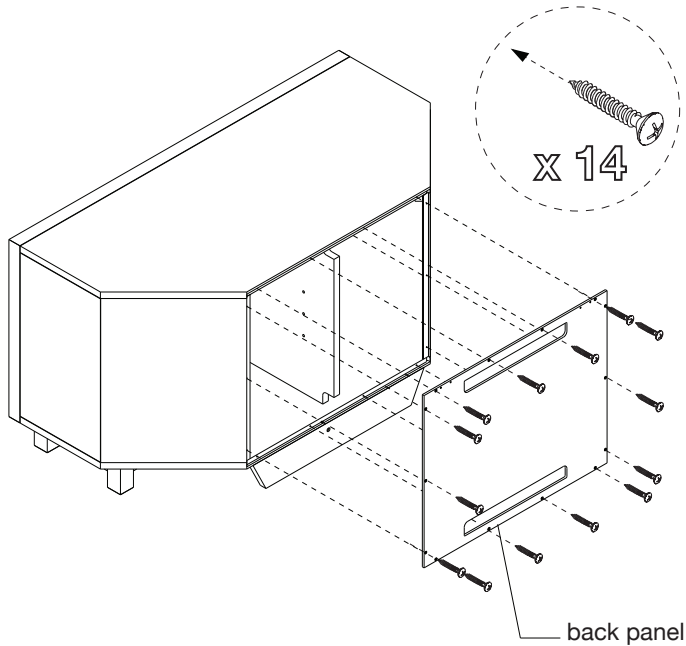

- ① A) Place **bottom panel** onto a clean, padded surface. Attach 4 **legs** to **bottom panel** with 2 **large bolts**, 2 **spring washers** and 2 **large flat washers** per leg as shown. Secure, but do not over tighten, bolts using an **allen wrench**.
- B) Attach 1 **bottom crossbar** to **bottom panel** with 2 **small bolts**, 2 **spring washers** and 2 **small flat washers** as shown, using a **phillips head screwdriver**.
- C) Secure **bottom crossbar** to **bottom panel** with 1 **large screw**, using a screwdriver.

- ② With the assistance of another adult, fit pre-assembled dowels of **left/right side panels**, **left/right back panels** and **partition** into corresponding holes of **bottom panel**. Secure **bottom panel** with 11 **large screws**, using a screwdriver.

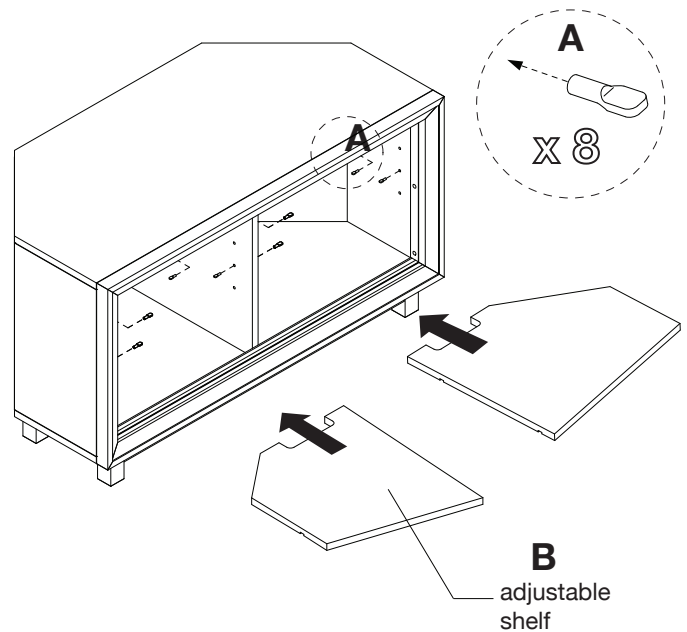

- ③ Fit pre-assembled dowels of **left/right side panels**, **left/right back panels** and **partition** into corresponding holes of **top panel**. Attach **top panel** with 8 **small bolts**, 8 **spring washers** and 8 **small flat washers** as shown, using a screwdriver.

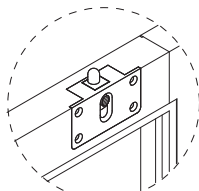

- ④ With the assistance of another adult, position assembled unit upright. Attach **front frame** to assembled unit with 12 **small bolts**, 12 **spring washers** and 12 **small flat washers** as shown, using a screwdriver.

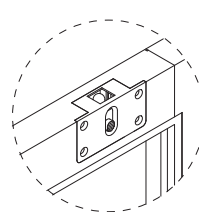

- ⑤ Attach **back panel** to assembled unit with 14 **small screws** as shown, using a screwdriver.

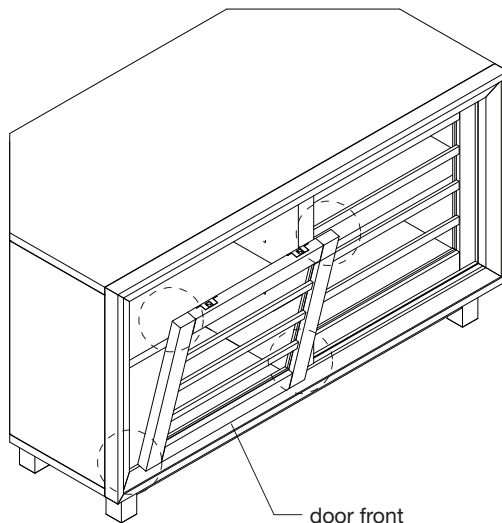

- ⑥ A) Insert 8 **shelf pins** at desired shelf heights.
B) Place 2 **adjustable shelves** into assembly as shown. Make sure that each shelf is securely supported by each shelf pin.

LOCKED POSITION

UNLOCKED POSITION

- ⑦ Push pins on top and bottom of **door front** down so that they are in the unlocked position. Fit **door front** into back groove of assembled unit. Push pins up to secure. *Repeat for remaining door front using the front groove of unit.*
Assembly is now complete.

CLEANING AND CARE

Clean surfaces with a dry or damp soft cloth. Do not use abrasive cleaners. Do not use furniture wax or polish as the wood is finished with a protective clear lacquer.

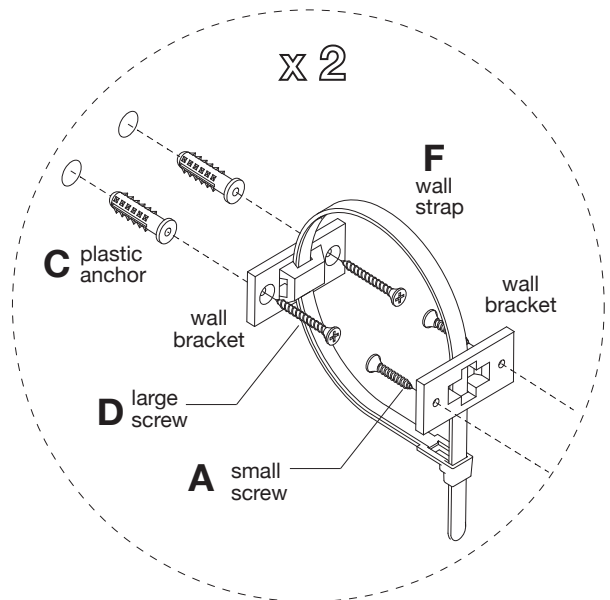

SAFETY MOUNTING INSTRUCTIONS:

For added safety and stability, it is recommended that the wall mounting hardware be installed. For safe mounting, it is essential to use wall anchors appropriate to your wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible.

- Attach 2 **wall brackets** to back of unit using 4 **small screws** as shown.
 - Determine the final location of unit. Mark position on the wall, approximately 2" below each wall bracket mounted to the back of the unit.
 - Drill a hole in the wall stud. If the wall stud is not available, drill a hole in the wall that is slightly smaller in diameter than the anchor. Gently tap the **plastic anchor** until the flange of the anchor is flush with the wall.
 - Attach **wall brackets** to the wall by inserting 2 **large screws** through each bracket and each plastic anchor in the wall.
 - Place the unit so the wall brackets on the back edge are aligned with the wall brackets on the wall.
 - Lace one end of the **wall straps** through each bracket, and into the other end of the strap.
 - Pull the strap tightly until secure.
- Wall mounting assembly is now complete.

NOTE:

If you are unsure about your wall type or what mounting method you should use, consult a qualified professional or your local hardware store.
