ball animal 3
The best cleaning performance of any upright de-tangling vacuum¹

360 vis nav
Sucks up more than any other robot across all floors⁸

¹Four-carpet Geomean per ASTM F608-18. Tested against corded vacuums marketed with de-tangling cleaner heads from Jan 2021 to Dec 2021. ²Run time based on consecutive use of two battery packs. Actual run time will vary based on power mode, dust level, floor type and/or attachments used. ⁴Accuracy may vary. Best accuracy in Auto mode. Auto ramp feature in Auto mode only. ⁵In Max mode. All other modes achieve at least 99.97% filtration. ⁶Filtration tested to ASTM F1977. ⁷ Tested per ASTM F3150 in Boost mode. When used as instructed. Filter tested against Influenza A (H1N1) and MS2 bacteriophage. Tested per ASTM F3150 in Boost mode. ⁸Straight-line pick-up performance based on market average, across three surface types, based on IEC 62885-7 and 62885-4, in Boost mode against robot vacuum markets (sales data from Jan 2021 to Dec 2021).
